## **GOYETTE MECHANICAL CHOOSING HILLIARD TO SERVE AS ITS SECONDARY HEADQUARTERS FACILITY**

**Columbus, Ohio** – Goyette Mechanical, a leading mechanical contractor that specializes in plumbing, piping, HVAC, and electrical systems, is significantly growing its footprint in Ohio with the establishment of a second headquarters facility in Hilliard. This expansion marks a major milestone in the company's strategic growth plan to better serve its customers in Ohio and neighboring states.

The new facility will be utilized for prefabrication, fabrication, welding, and assembly of complex plumbing, piping, and HVAC systems for industrial and commercial customers. This expansion will support local projects in and around the Columbus area, as well as projects in Missouri, Pennsylvania and Tennessee.

“The continued economic momentum happening here in Ohio is a big reason why a well-established and successful company like Goyette Mechanical chose to more than double its workforce at its Hilliard campus,” said JobsOhio President and CEO J.P. Nauseef. “The new facility and addition of 90 new associates will enhance Goyette’s design and fabrication capacity to serve their current and future customers more efficiently while contributing to the region's economic vitality.”

The Hilliard expansion will create new jobs that will include plumbers, pipefitters, sheet metal workers, virtual designers for construction, project managers, and administrative staff.

“Goyette is a true success story in our community, and we’re excited to have them demonstrate their belief in our city by committing to this major expansion,” said Hilliard City Manager Michelle Crandall. “Hilliard is a destination for companies seeking to grow due to its highly skilled labor force, creative initiatives such as Hilliard City Lab and community collaboration, fostering an environment for continued business success.”

Goyette has committed to investing in excess of \$1 million in financial investments at the project location in building improvements, new machinery and equipment costs, employee training, and other information systems and software technology costs. The facility is expected to be operational by March 1, 2025.
